Web sitesi yenileme önerisi

banksoft.com.tr için sade, güven veren ve mobil uyumlu yeni bir kurumsal site. Tasarım, içerik ve teknik altyapı tamamlandı; test ortamında incelemeye hazır.

PAYMENT SYSTEMS SOFTWARE SINCE 1995

The software behind **75 million** cards in Türkiye.

Banksoft designs, builds and runs card management, terminal and switching platforms for banks that cannot afford a second of downtime. Turnkey. Certified. Proven at national scale.

About Banksoft

• EMV CERTIFIED

• PCI SSC PARTICIPATING MEMBER

• VISA & MASTERCARD

Banksoft'un ölçeğine yakışan bir dijital vitrin.

- Mevcut site 2000'lerin başındaki tablo tabanlı tasarımıyla şirketin bugünkü konumunu yansıtmıyor ve mobil cihazlarda okunamıyor.
- Yeni site, logodaki kırmızı ve gri-mavi renklerden türetilen sade bir tasarım sistemi üzerine kuruldu; kırmızı yalnızca vurgu için kullanılıyor.
- Tüm içerik mevcut siteden alındı ve yeniden yapılandırıldı: 30'dan fazla ürün altı ailede, 20 tarihli haber, 35+ müşteri, 9 ülke.
- İngilizce ve Türkçe sürümler, iletişim formu, harita, KVKK metni ve arama motoru altyapısı hazır. Şirketten yalnızca birkaç girdi bekleniyor.

7 × 2

sayfa, iki dilde

30+

ürün, altı ailede

0

sunucu bağımlılığı

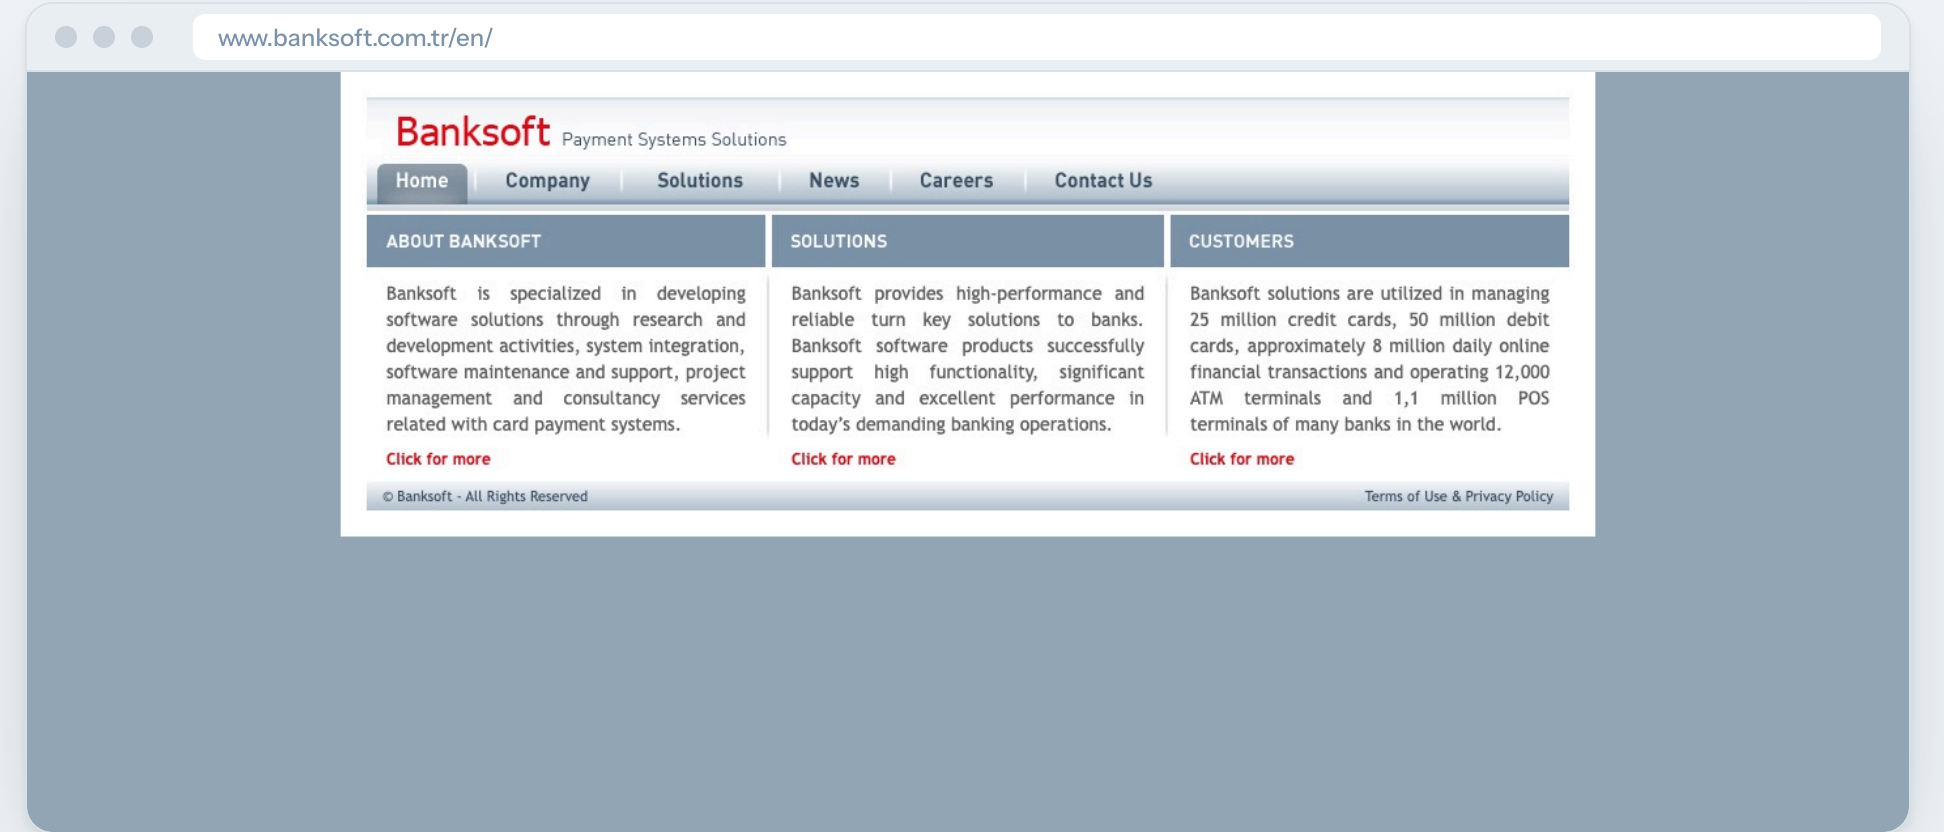

%100

mobil uyumlu

Test adresi: yönetime ayrıca iletilecek bağlantıdan tüm sayfalar masaüstü ve telefonda incelenebilir.

Neden şimdi yenilenmeli?

- **Mobilde kullanılamıyor.** 960 piksel sabit genişlik; telefonda yakınlaştırma gerekiyor.
- **Güncel değil.** Haber sayfasındaki en yeni kayıt Aralık 2014.
- **Bulunamıyor.** Sayfa adresleri *Content.aspx?UstIcerikID=...* biçiminde; arama motorları için anlamsız.
- **Marka gücünü yansıtmıyor.** Türkiye'nin en büyük bankalarına hizmet veren bir şirketin sitesi, küçük bir yazılım evi gibi görünüyor.
- **Erişilebilirlik ve güvenlik.** Menüler görsel dosyalardan oluşuyor; ekran okuyucular ve yeni tarayıcı standartlarıyla uyumsuz.

Mevcut ana sayfa, 1440 px genişlikte: içerik ekranın üçte birini dolduruyor.

Sade, şık ve güven veren. Bankaların beklediği ciddiyette.

01

Önce içerik

Rakamlar, ürünler ve referanslar ilk ekranda. Süsleme yok, boş metin yok.

02

Marka renklerine sadakat

Logodaki kırmızı yalnızca eylem ve vurgu için; zemin lacivert ve açık gri.

03

Her cihazda

Telefon, tablet, masaüstü; açık ve koyu tema; ekran okuyucu uyumu.

04

Yenilikçi ama ölçülü

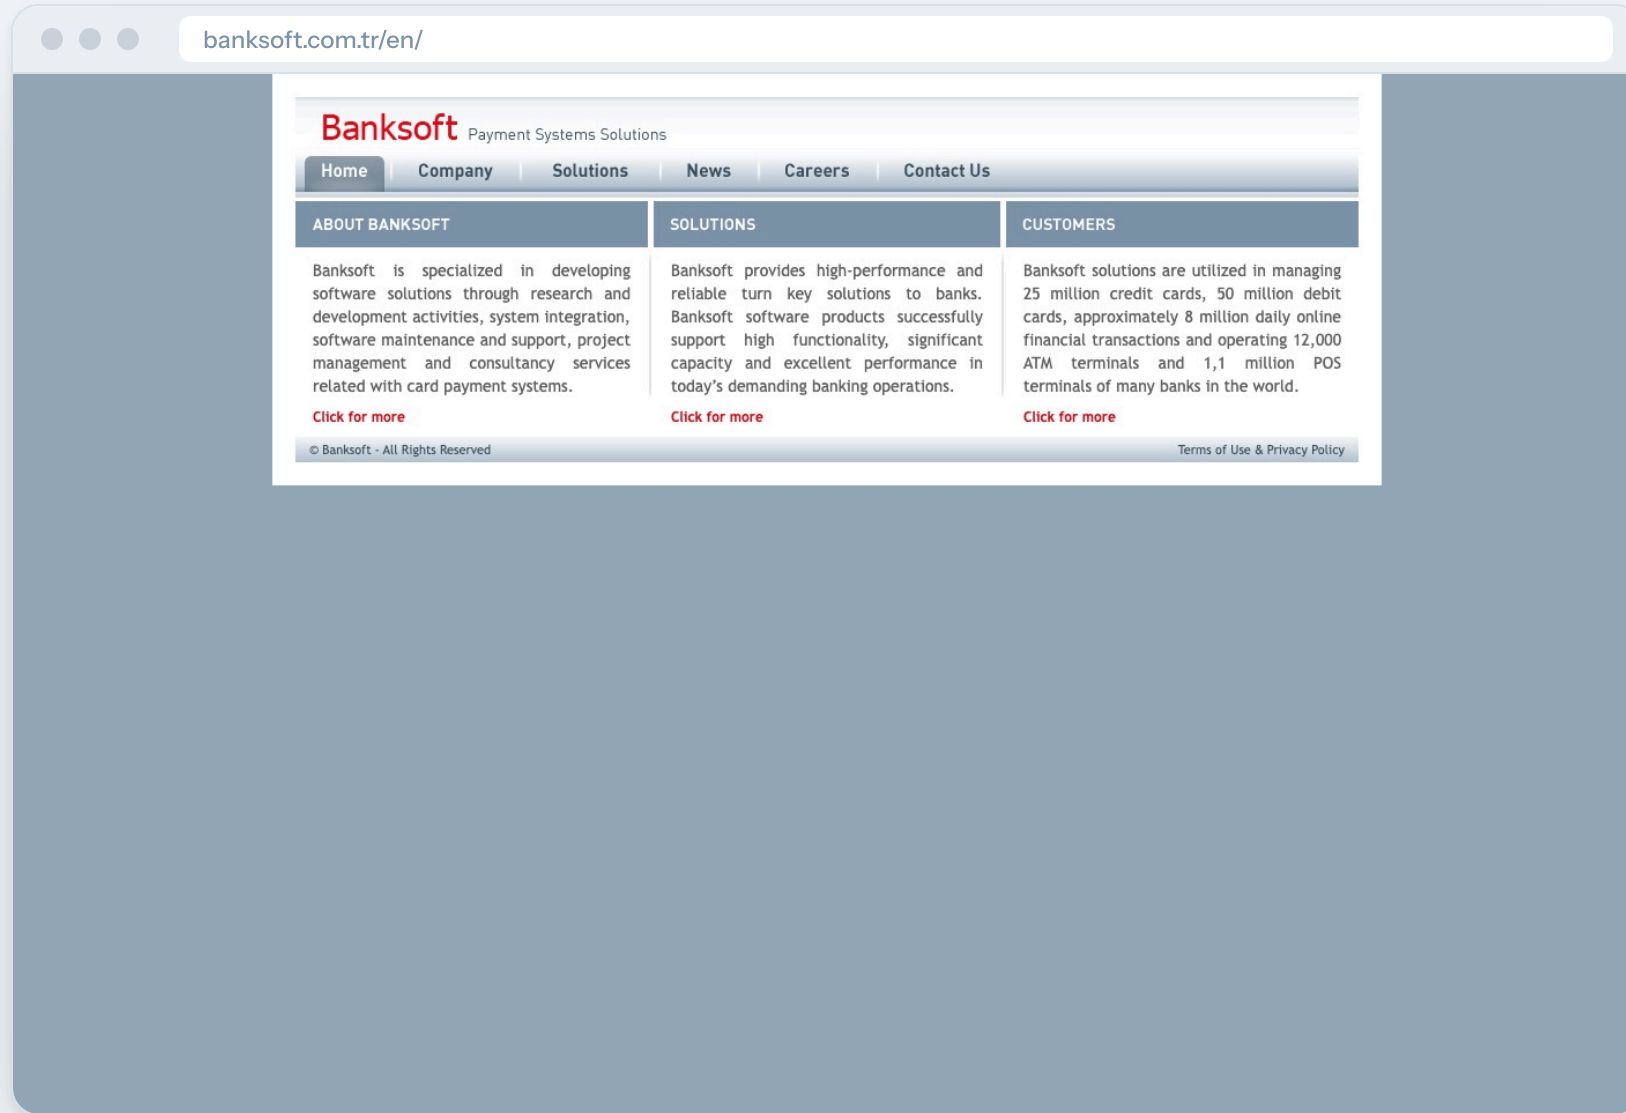

Ana sayfada canlı işlem akışı paneli gibi tek bir ayırt edici öge; gerisi sakın.

Hedef kitle: banka ve ödeme kuruluşlarının teknoloji yöneticileri, iş ortakları ve potansiyel çalışanlar. Site bir satış aracı değil, bir güven belgesi gibi kurgulandı.

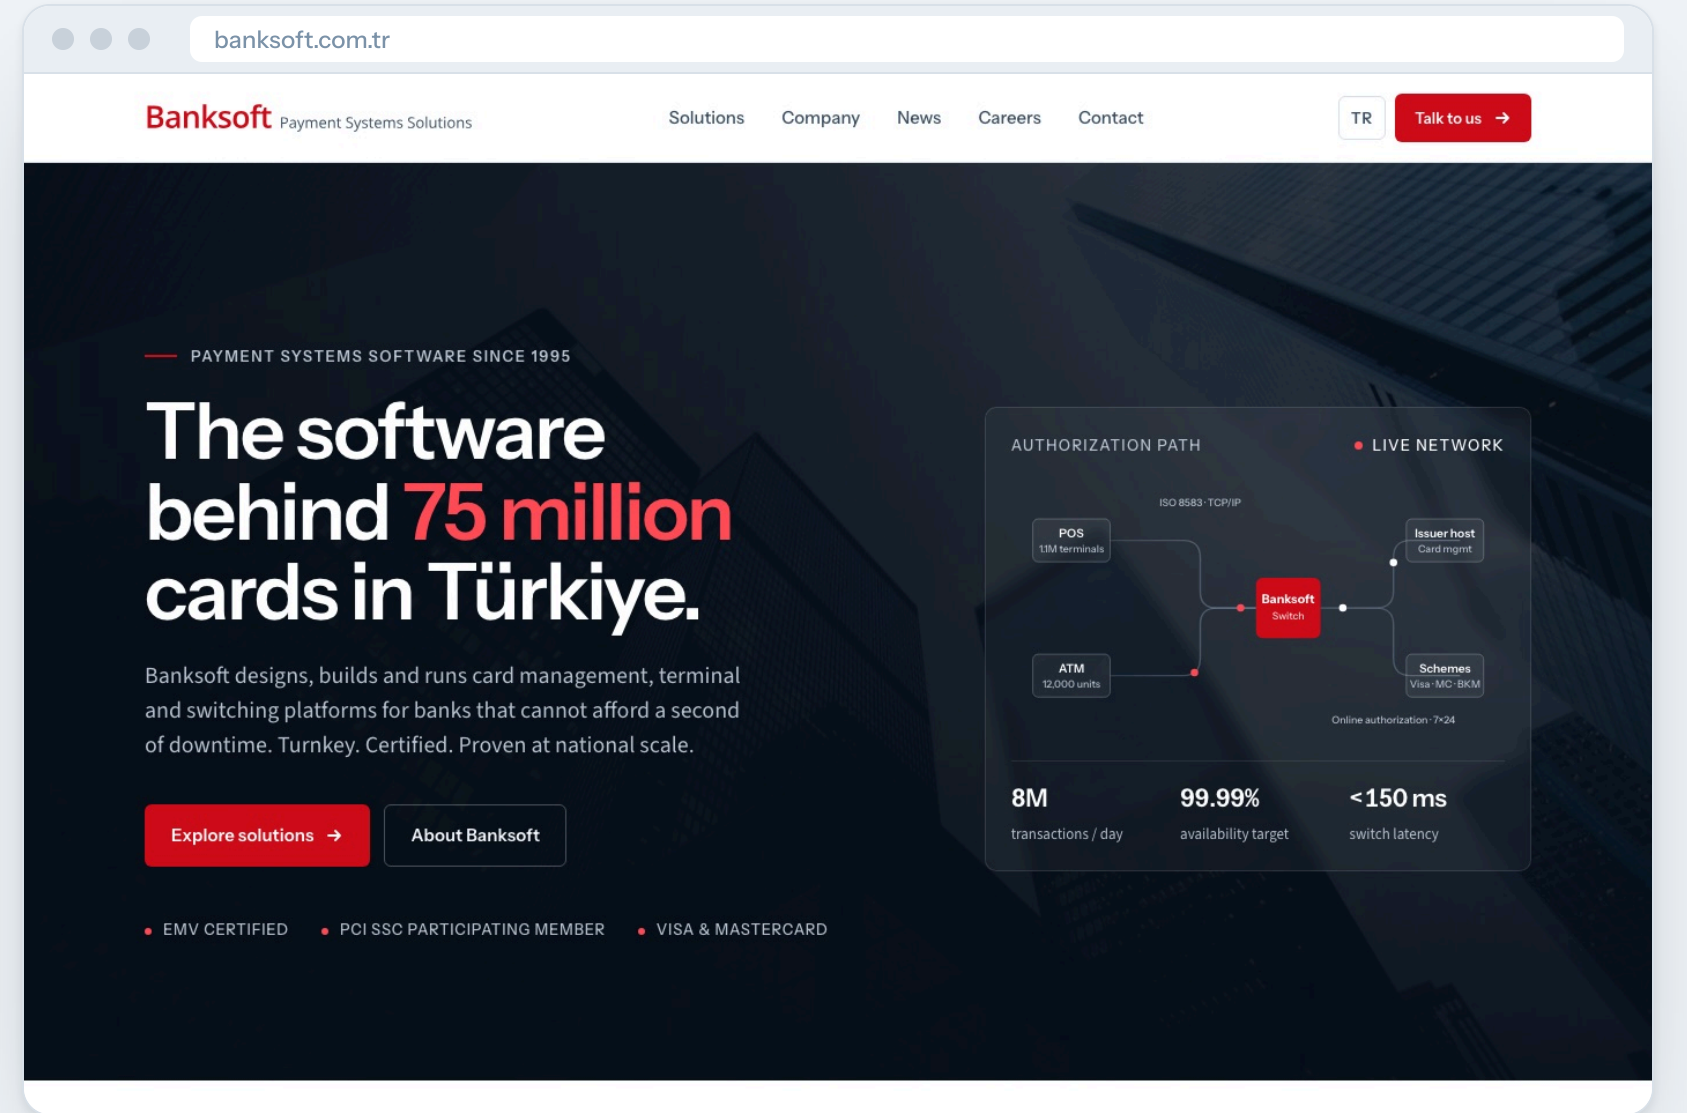

— ÖNCESİ VE SONRASI

Aynı içerik, yeni duruş.

MEVCUT

ÖNERİ

Logodan türetilen renkler, iki yazı tipi, tek kural seti.

Kırmızı, sayfa alanının yüzde birinden azında kullanılıyor: düğmeler, kısa çizgi vurguları ve öne çıkan rakamlar. Bu ölçülülük siteye banka müşterilerinin beklediği ağırlığı veriyor.

BAŞLIK · INSTRUMENT SANS

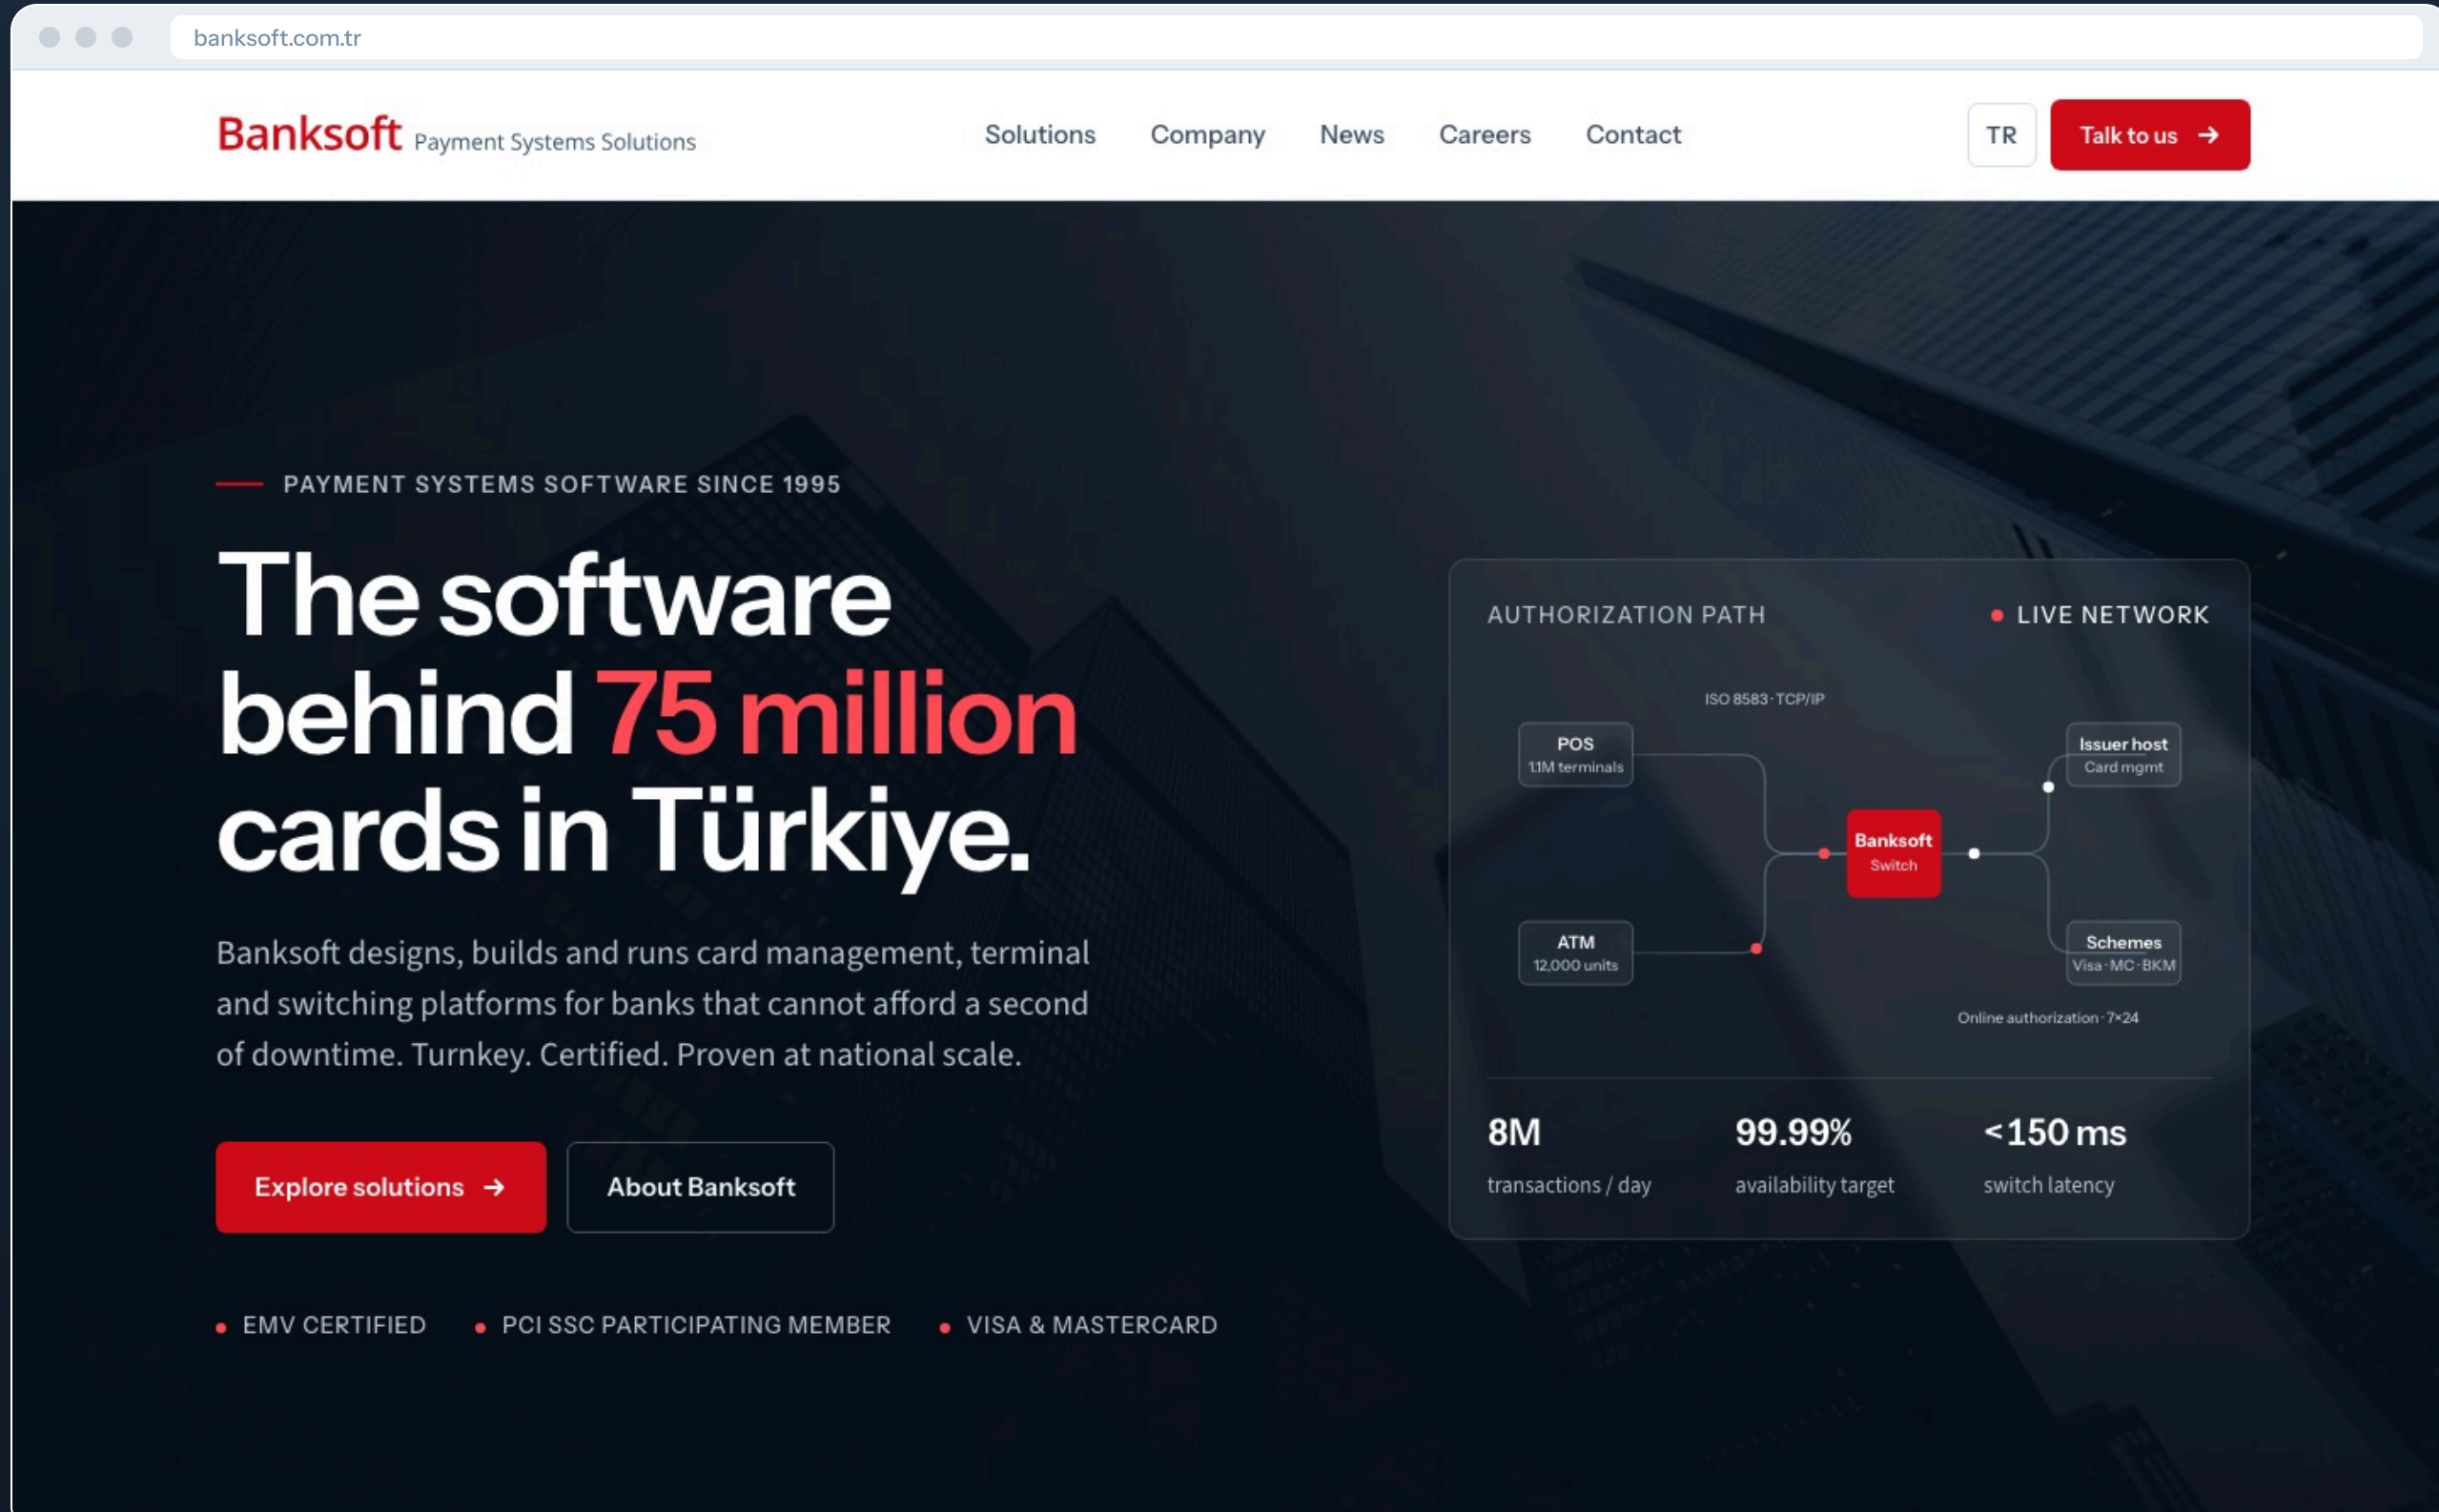

75 milyon kartın arkasındaki yazılım.

METİN · SOURCE SANS 3

Banksoft, bir saniyelik kesintiyi bile göze alamayan bankalar için kart yönetimi, terminal ve switch platformları tasarlar, geliştirir ve işletir.

LOGO · VEKTÖR OLARAK YENİDEN ÇİZİLDİ

Banksoft Payment Systems Solutions

— ANA SAYFA · İLK EKRAN

Başlık şirketin en güçlü kanıtını söylüyor: Türkiye'deki 75 milyon kart. Sağdaki panel, bir işlemin POS ve ATM'den Banksoft switch'ine, oradan ihraççıya ve kart şemalarına akışını canlı olarak gösteriyor.

Yukarıdan aşağıya bir güven hikâyesi.

- Referans bankalar şeridi
- Altı çözüm ailesi
- Üretimdeki rakamlar (25M, 50M, 8M, 1,1M, 12K)
- Üç öne çıkan ürün, fotoğraflı
- Neden Banksoft: dört gerekçe
- Dokuz ülkede kurulum
- Tarihli haberler ve iletişim çağrısı

WHAT WE BUILD

One platform family, from the chip in the card to the settlement file.

Every Banksoft product is built in-house, integrates with the others, and runs on open platforms your teams already know.

Card management

Issue and run credit, debit, prepaid and commercial portfolios on one host, single- or multi-institution.

— All-in-One Card Management

— Multi-institutional CMS

— EMV script & transaction analysis

See card products →

ATM & POS management

Multi-vendor terminal networks with remote key loading, e-journal and real-time monitoring.

— ATM management & remote key

— POS management & field service

— Payment gateway

See terminal products →

Switch, clearing & settlement

Route, clear and settle domestic and international traffic with full chargeback lifecycle support.

— Switch management & simulator

— Domestic & international clearing

— Chargeback document management

See integration products →

Personalization

Pre-personalization, chip personalization and instant issuing at the branch, on any card body.

— Chip card personalization

— Instant chip card issuing

— Contactless & industrial chip apps

See personalization →

Fraud & risk

Score every authorization in real time, evaluate limits and manage applications end to end.

— Intelligent fraud detection

— Limit evaluation

— Card & merchant application

See risk products →

Mobile & digital

Mobile financial services, HCE wallets, campaign engines and internet banking management.

— Mobile financial services

— Card, merchant & ATM campaigns

— Internet banking management

See digital products →

SCALE IN PRODUCTION

Numbers our customers run on, every day.

Across Türkiye, Banksoft applications carry a large share of national card traffic without performance limits.

25M

credit cards managed

50M

debit cards managed

8M

online transactions a day

1.1M

ATM terminals

ALL-IN-ONE CMS

CARD MANAGEMENT

Every card type, every institution, one host.

The All-in-One Card Management System runs credit, debit, prepaid, business, supply chain and farmer cards side by side. Multi-institutional mode lets a processor serve many banks on the same installation with strict data separation.

✓ EMV issuer script and transaction analysis built in

✓ Contactless, highway tolling and industrial chip applications

✓ Migrated from mainframe to open platforms at lower operating cost

Card management systems →

TERMINAL MANAGEMENT

Türkiye's first EMV-certified ATM acquiring system.

Unlimited terminals, unlimited cards, any vendor. NCR, Diebold and Wincor Nixdorf fleets run on the same platform with remote key loading, cassette-level balance tracking, e-journal capture and live status monitoring across the network.

✓ Remote key management, no site visits

✓ Card-to-card transfers, campaigns and deposits at the ATM

✓ Integrates with core banking, CRM, IVR and call centre

ATM & POS management →

ATM MANAGEMENT

DIGITAL PAYMENTS

From plastic to phone, without a second platform.

Host Card Emulation, mobile financial services and contactless issuance run on the same card host. Banksoft completed one of Türkiye's first HCE proof-of-concepts and has supported issuers through every step from magstripe to tap-to-pay.

✓ Tokenised credentials on the existing card master

✓ Campaign management across card, merchant and ATM channels

✓ Online utility payment interfaces and payment gateway

Mobile & digital products →

MOBILE & CONTACTLESS

WHY BANKS CHOOSE BANKSOFT

Built by one team. Owned end to end.

No resold modules, no offshore hand-offs. The people who wrote the switch sit next to the people who wrote the card host.

R&D

Everything developed in-house

Research, development, integration, maintenance and support from a single, accountable team in Istanbul.

OPEN

Open platforms, lower total cost

We have moved large issuers off complex legacy hosts to open platforms with more features and lower operating cost.

CERT

Certified where it matters

EMV acquirino and issuance PCI security standards, Visa, Mastercard and BKM interfaces, all

BEYOND TÜRKİYE

Deployed in nine countries, from the Balkans to Central Asia.

Banksoft platforms serve issuers and acquirers across Eastern Europe, the Caucasus and Central Asia, localised for each market, schemes, regulators and languages.

SOLUTIONS

Thirty-plus products. One integrated payment stack.

Each product below is developed and supported by Banksoft. Deploy one, or run the complete issuing and acquiring chain on a single platform.

Card management

Personalization

ATM & POS management

Switch, clearing & settlement

Fraud, risk & applications

Mobile & digital

CARD MANAGEMENT SYSTEMS

Issue and run any card portfolio.

Single- or multi-institution hosts for every card product a bank issues, with EMV tooling built in.

All-in-One Card Management System **FLAGSHIP**

Credit, debit, prepaid and commercial cards on one host.

Credit Card Management System

Revolving credit, instalments, statements, collections.

Multi-Institutional Card Management System

Serve many issuers on one installation with strict data separation.

Debit Card Management System

Account-linked cards with online balance and limit control.

Prepaid Card Management System

Open- and closed-loop stored value products.

Business, Supply Chain & Farmer Card Systems

Commercial programmes with sector-specific limits and settlement.

Chip Card Applications

Contact, contactless and industrial chip applications.

Highway Contactless Payment System

Tolling and transit on standard contactless cards.

EMV Issuer Script Management

Post-issuance updates to chip parameters over the network.

EMV Transaction Analysis System

Decode, validate and troubleshoot EMV data end to end.

PERSONALIZATION

From data preparation to instant issuing.

Prepare, personalise and hand over chip cards at the bureau or at the branch counter.

Pre-Personalization System

Key generation and data preparation for personalization bureaux.

Chip Card Personalization System **FLAGSHIP**

High-volume EMV personalization with scheme-compliant key handling.

Instant Chip Card Issuing System

Issue a personalised chip card at the branch in minutes.

ATM & POS MANAGEMENT

Multi-vendor terminal networks, monitored live.

NCR, Diebold and Wincor Nixdorf fleets, X.25 to TCP/IP, all under one management console.

ATM Management System **FLAGSHIP**

Türkiye's first EMV-certified ATM acquiring. Unlimited terminals and cards.

Message Encryption System

Hardware-backed encryption for host and terminal traffic.

POS Management System

Merchant terminals, parameters and software distribution.

Payment Gateway System

E-commerce acceptance with 3-D Secure and tokenisation.

Remote Key Management

Load and rotate terminal keys without a site visit.

E-Journal Management System

Centralised electronic journal capture and search.

Field Service Tracking System

Dispatch, track and close terminal maintenance jobs.

SWITCH, CLEARING & SETTLEMENT

Route, clear and settle at national scale.

Domestic and international schemes, chargebacks and utility payments, on a switch you can simulate before you go live.

Switch Management System **FLAGSHIP**

Online authorization routing across issuers, acquirers and schemes.

Clearing & Settlement Management

Domestic scheme files, reconciliation and settlement positions.

International Clearing & Settlement

Visa and Mastercard clearing with multi-currency settlement.

Chargeback Document Management

Full dispute lifecycle with scheme-compliant documentation.

Online Utility Payment Interface

Bill payments for utilities and public institutions.

Switch Simulator

Certify and regression-test host interfaces without production risk.

FRAUD, RISK & APPLICATIONS

Decide in milliseconds, onboard in minutes.

Real-time scoring on every authorization and a complete application pipeline for cardholders and merchants.

Intelligent Fraud Detection System **FLAGSHIP**

Rule- and model-based scoring inline with authorization.

Limit Evaluation System

Credit limit assignment and periodic review workflows.

Card Application System

Cardholder onboarding, scoring and decisioning.

Merchant Application System

Merchant onboarding, underwriting and contract management.

MOBILE & DIGITAL

Digital channels on the same card host.

Wallets, campaigns and internet banking that reuse the card master instead of duplicating it.

Mobile Financial Services **FLAGSHIP**

HCE, tokenised cards and mobile payments.

Card & Merchant Campaign Management

Targeted offers, instalment campaigns and loyalty rules.

ATM Campaign Management

Offers and cross-sell at the ATM screen.

Internet Banking Management System

Card services in the bank's digital channels.

ABOUT BANKSOFT

Three decades of card payment software, built in Istanbul.

Since 1995, Banksoft has focused on one thing: software for card payment systems. Research and development, system integration, maintenance and support, delivered as turnkey solutions to banks.

WHO WE ARE

A specialist, not a generalist.

Banksoft provides software solutions through research and development and system integration services related to card payment systems, along with consultancy and project management for payment technology. Since our founding the professional team has grown steadily while service quality has kept improving, and banks throughout Türkiye and abroad rely on us for their payment software.

We have led some of the market's largest transitions from complex legacy hosts to open platforms, cutting operating cost while adding the features the market demanded. The result is infrastructure that delivers high performance, availability, quality and functionality without performance limitations.

ÇAMLICA, ISTANBUL

MILESTONES

Milestones since 1995.

A selection from three decades of firsts in the Turkish payments market, with the year each one shipped.

1995	founded	75M	cards on Banksoft hosts	9	countries deployed	35+	financial institutions	8M	transactions a day
1995	Banksoft founded Established in Istanbul to build card payment software for banks.								
2008	Deloitte EMEA Technology Fast 500 Ranked 230th fastest-growing technology company in EMEA with 749% growth.								
2009	Europe's first EMV prepaid contactless debit card Halkbank's Bank24 Jet card launched on Banksoft solutions.								
2010	First Turkish participating organization in the PCI Security Standards Council A seat at the table where card security standards are written; Deloitte Fast 50 Türkiye for the fifth time the same year.								
2012	BKM dual-messaging migration in one night Banksoft systems carried the Interbank Card Center's big-bang switch from single to dual messaging.								
2013	Contactless dual-interface cards for transit								

2014

HCE proof-of-concept and card-to-card transfer at the ATM
Mobile EMV without a secure element, and instant card-to-card transfers from Ziraat Bankası ATMs.

CUSTOMERS

Banks, processors and telecoms that run on Banksoft.

From Türkiye's largest state and private banks to regional issuers in Eastern Europe and Central Asia.

Ziraat Bankası	İşbank	Akbank	VakıfBank	Halkbank
Yapı Kredi	QNB Finansbank	Kuveyt Türk	İNG Türkiye	Fibabanka
Anadolubank	Burgan Bank	Enpara	BKM	Cardplus
Credit Europe Bank Romania · Russia	Halkbank Macedonia · Bulgaria · Serbia	TEB Kosovo	Demir Kyrgyz Bank Kyrgyzstan	Exim Bank Romania
Koopbank	Ikano Group	Turkcell	Vodafone	Arçelik

PARTNERS

Certified against the schemes and standards our customers answer to.

We keep every interface current as the schemes evolve, so our customers do not have to.

Visa & Mastercard
Issuing and acquiring interfaces, EMV and contactless kernels, international clearing.

BKM
Domestic switch, clearing and settlement with the Interbank Card Center of Türkiye.

PCI Security Standards Council
Participating organisation, contributing to the standards our platforms are audited against.

ATM vendors
NCR, Diebold Nixdorf and Wincor fleets on a single management platform.

Chip & HSM suppliers
Personalization and key management integrated with leading hardware security modules.

Core banking systems
Proven integrations with core banking, CRM, I/R and call-centre platforms.

Banksoft · Web sitesi yenileme önerisi

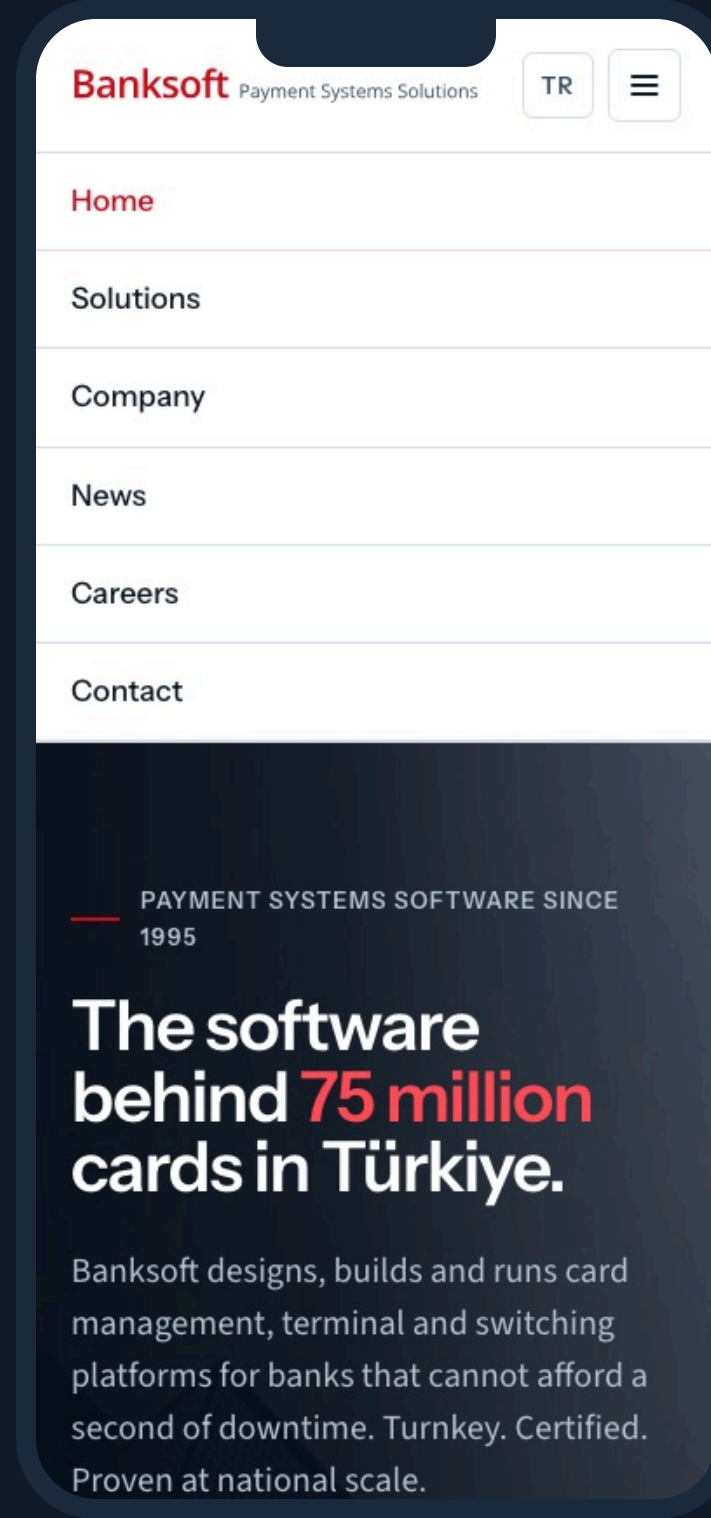

12

MOBİL GÖRÜNÜM

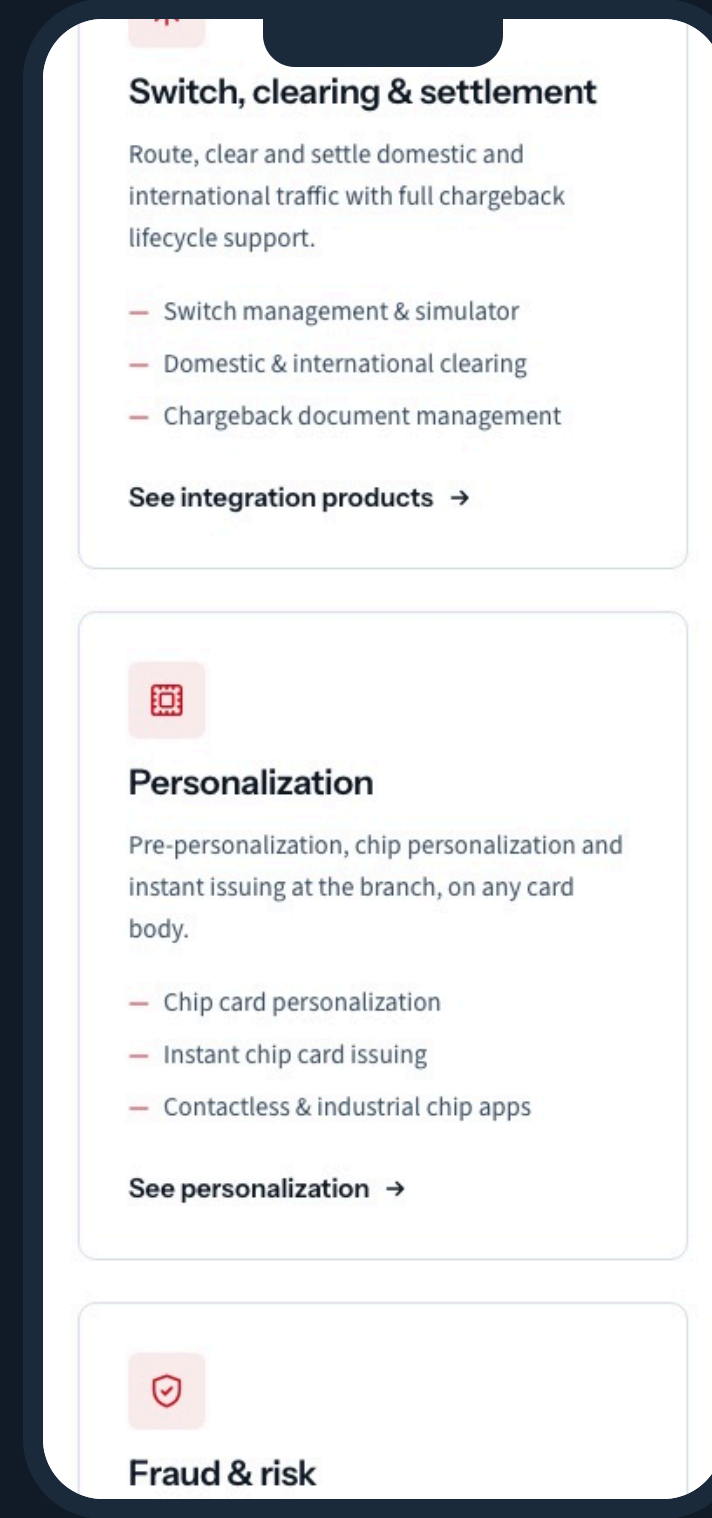

Telefonda da aynı ciddiyet.

Tüm sayfalar 390 piksel genişlikte test edildi. Menü tek dokunuşla açılıyor, rakamlar ve ürün kartları tek sütuna iniyor, form ve harita parmakla kullanılabilir.

Banka yöneticilerinin siteye ilk kez telefonda bakma olasılığı yüksek; mevcut site bu senaryoda okunamıyor.

Açık menü

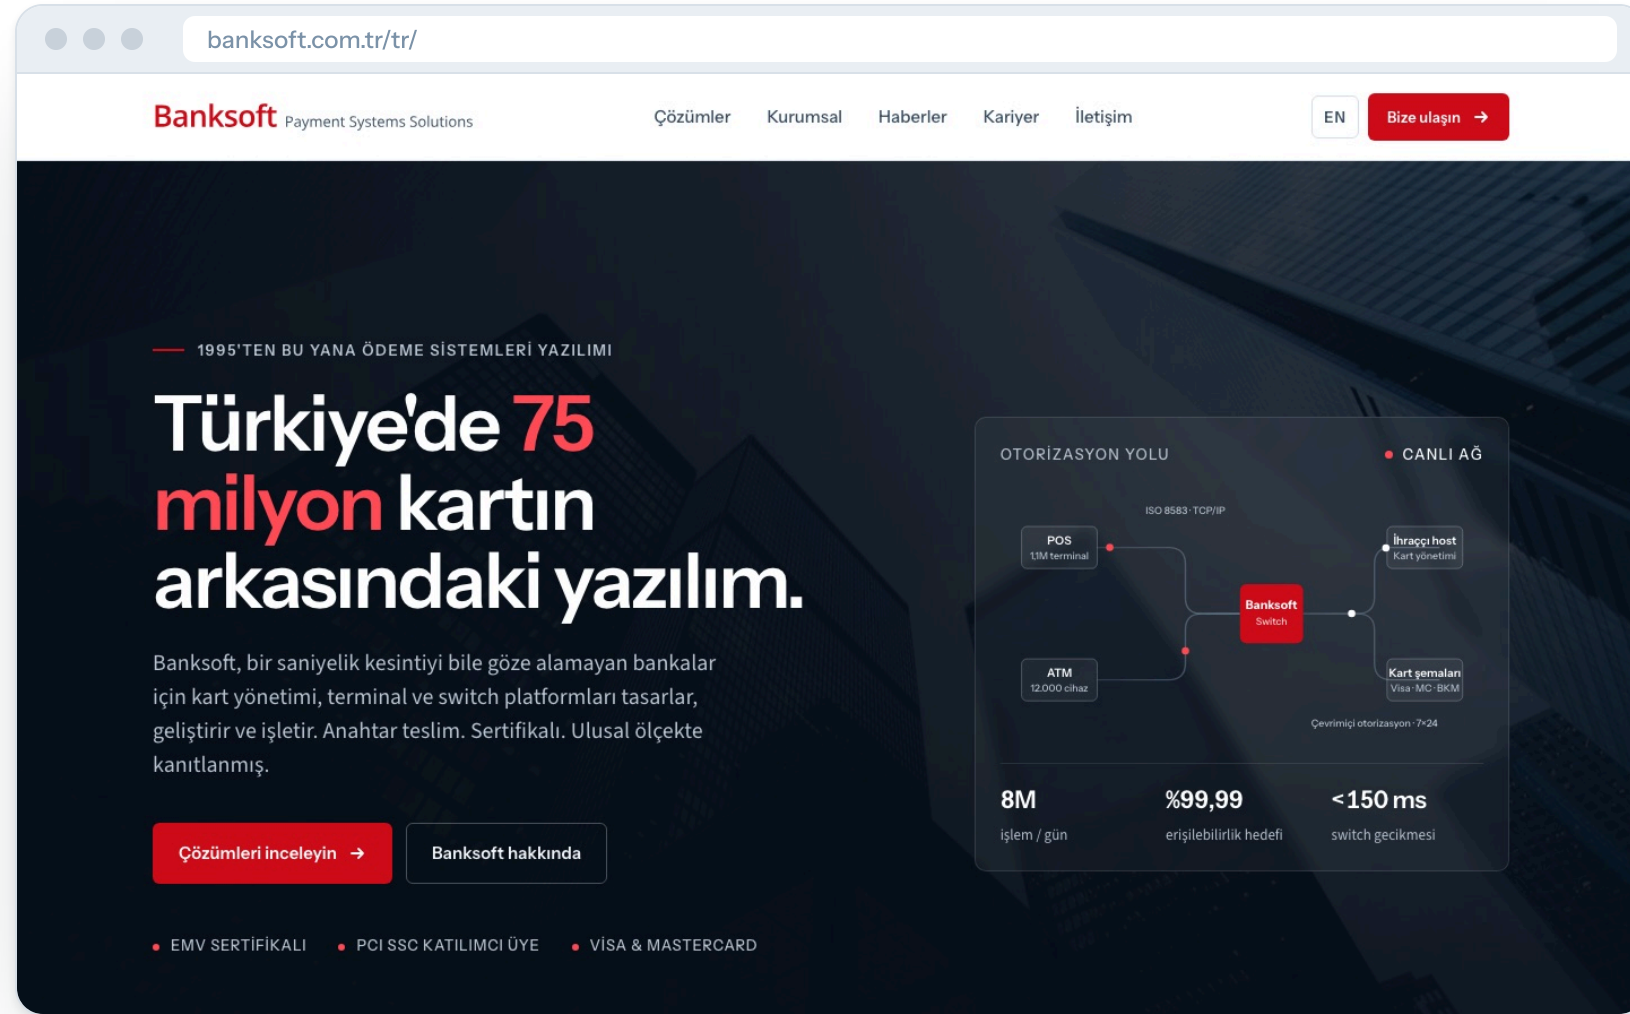

Ana sayfa, çözümler

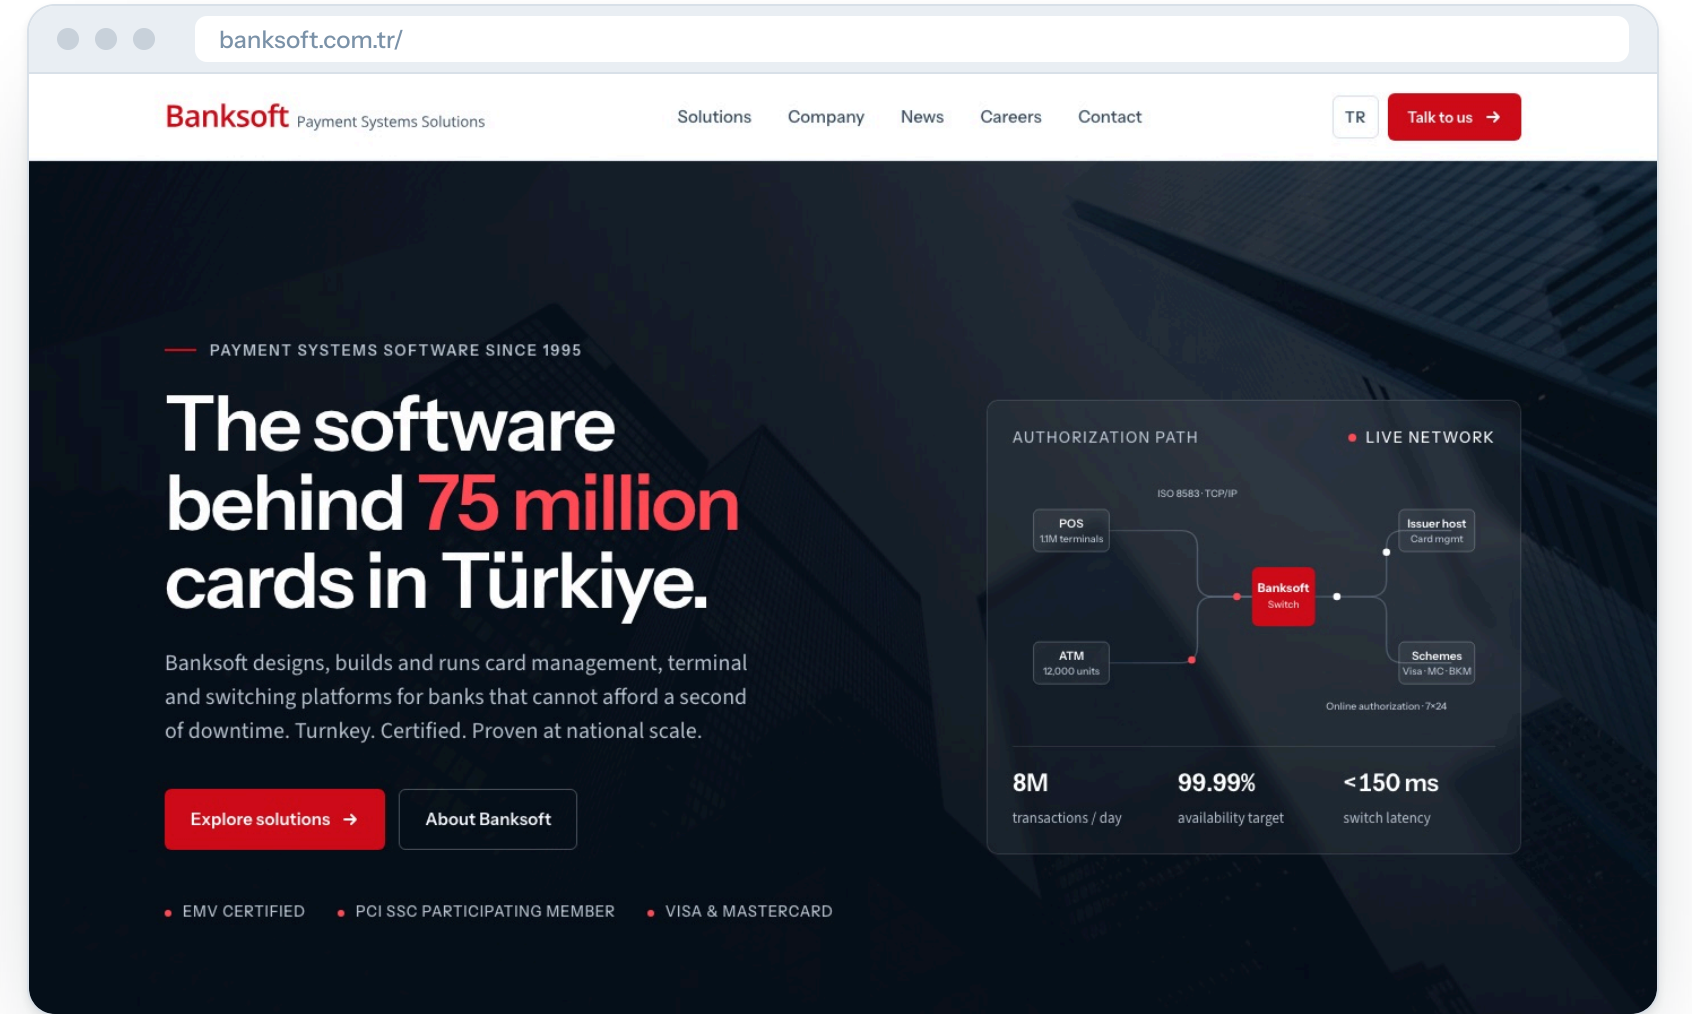

İletişim, Türkçe

— İKİ DİL

Türkçe ve İngilizce, aynı yapı, aynı özen.

Türkçe sürüm /tr/ altında; sağ üstteki EN/TR düğmesi her sayfayı karşılığına bağlıyor.

Arama motorları için her sayfada dil alternatifleri (hreflang) ve iki dilli site haritası tanımlı.

Basit, hızlı ve güvenli: statik site.

- **Sunucu bağımlılığı yok.** Yalnızca HTML, CSS ve görsel dosyaları; herhangi bir web sunucusuna kopyalanarak yayınlanır. Veritabanı, .NET ya da içerik yönetim sistemi gerektirmez.
- **Küçük saldırı yüzeyi.** Çalıştırılabilir sunucu kodu olmadığı için güncelleme ve yama yükü yoktur; PCI ortamındaki bir şirket için önemli bir sadeleşme.
- **Hızlı.** Sayfa başına yaklaşık 30 KB kod; fotoğraflar sıkıştırılmış ve tembel yüklenir.
- **Arama motorlarına hazır.** Anlamlı adresler, başlık ve açıklama etiketleri, site haritası, Open Graph paylaşım kartları.
- **Erişilebilir.** Klavye ile gezilebilir, ekran okuyucu etiketleri, azaltılmış hareket tercihi, yeterli kontrast.
- **Açık ve koyu tema.** Ziyaretçinin sistem tercihinine göre otomatik.
- **Kolay güncelleme.** İçerik düz HTML dosyalarında; küçük bir derleme scripti iki dili ve site haritasını üretir.
- **Esnek barındırma.** Şirket sunucusu, GitHub Pages, Cloudflare veya mevcut hosting; hepsi uygundur.

Tamamlananlar ve Őirketten beklenen girdiler.

KONU	DURUM	AÇIKLAMA
Tasarım ve 14 sayfa (EN + TR)	Tamamlandı	Masaüstü ve mobilde test edildi.
İçerik aktarımı	Tamamlandı	Ürünler, rakamlar, müşteriler, tarihli haberler, yol tarifi.
Form, harita, yasal metinler, SEO	Tamamlandı	Yasal metinler hukuk incelemesi ister.
Resmi vektör logo	Őirketten	Logo vektör olarak yeniden çizildi; orijinal dosya varsa deęiŐtirilecek.
Fotoęraflar	Őirketten	Őu an lisanslı stok görseller; bina, ofis ve ekip fotoęrafları tercih edilir.
Güncel haberler	Őirketten	2014 sonrası gelişmeler için 3–5 kısa haber yeterli.
Yayın kararı ve alan adı yönlendirmeleri	Őirketten	Eski Content.aspx adreslerinden yeni sayfalara yönlendirme, BT ile birlikte.

Üç haftada yayına alınabilir.

HAFTA 1

İnceleme ve geri bildirim

Yönetim ve satış ekibi test adresinde siteyi inceler; metin ve öncelik düzeltmeleri toplanır.

HAFTA 2

Şirket girdileri

Logo, fotoğraflar, güncel haberler ve yasal onay eklenir; form servisi bağlanır.

HAFTA 3

Yayın

BT ile sunucuya kurulum, eski adreslerin yönlendirilmesi, arama motorlarına site haritası bildirimi.

Yayın sonrası bakım yükü düşüktür: yeni bir haber ya da ürün eklemek, tek bir HTML dosyasını düzenleyip derleme scriptini çalıştırmaktan ibarettir.

— TEŞEKKÜRLER

Siteyi test ortamında inceleyin, görüşlerinizi paylaşın.

Test bağlantısı ve bu sunum, geri bildirimlerinizin toplanması için ayrıca iletilecektir. Tüm sayfalar masaüstü ve telefonda incelenebilir.
